[Network meeting \(open\) 05: Elite sports and expertise,
Hall Tirol, Juli 19, 2024, 14:40 - 15:40](#)

Since the early 2000s, sports psychology has been a part of the German Soccer system. Today the DFB is one of the leading examples implementing a scientific-based concept of sports psychology in a soccer system. We want to give you an impression of our sport psychological work in national teams and the psychological program within the soccer coach education. We also want to discuss differences between a psychological work in national teams and soccer clubs. You will also get an overview of how to implement psychological diagnostics in team sports. We will be a team of five experts working in national teams, for the DFB and for professional soccer clubs like FC Bayern München or TSG Hoffenheim. Let's come together to share our experiences. After a short introduction of each speaker, we want to get in an exchange with you.

This network event is open to everybody who is interested in soccer, team sports, national teams, or sports associations.
